¹"During the past 2 years, has your state provided any funding for or offered staff development to districts or schools on how to implement the following types of prevention policies and programs? This might include workshops, conferences, continuing education, graduate courses, or any other kind of in-service: (a) violence prevention policies or programs, (b) harassment prevention policies or programs, (c) tobacco use prevention policies or programs, (d) alcohol use prevention policies or programs, (e) Illegal drug use prevention policies or programs, or (f) accident or injury prevention policies or programs?" (State Environment Questionnaire, Items 38a-f)

²Although the SHPPS 2000 questionnaires used the word "accident" because it is familiar to many people, public health officials prefer the word "injury" because it connotes the medical consequences of events that are both predictable and preventable.
